

VOMITING TREATMENT TIPS

Withhold food for 24 hours, up to 48 if needed.

Encourage drinking. If no interest in water, offer ice chips, Gatorade, Pedialyte or warmed chicken or beef broth.

Offer no more ice than one cube every 15 minutes.

1 tsp Kaopectate for each 10 lbs. Check with vet first.

1 tsp Pepto Bismol per 20 lbs every 4-6 hours. Check with vet first.

Instead of going to regular diet after stomach issues, try the bland diet for several days.

BLAND DIET RECIPE

2 parts cooked, white rice*. Drain excess water.

1 part boiled hamburger or skinless, white chicken. Drain excess water.

Mix together.

*In place of rice, you can try pasta or mashed potatoes.

Feed small amounts of this mix every 4 hours for 2 days. After 2 days return to regular diet keeping about ¼ of the diet as the bland diet, offer this combination for 4 days.
